

EDUCATION

RWTH AACHEN UNIVERSITY

DR.-ING. (PHD)

INSTITUTE FOR DATA SCIENCE IN

MECHANICAL ENGINEERING

Expected Mar 2027 | Germany

Supervisor: Prof. Dr. Sebastian Trimpe

Associated Researcher at RTG UnRAVeL

M.Sc. AUTOMATION ENGINEERING

Dec 2021 | Germany

Grade: 1.1 (1.0 = best)

With distinction

B.Sc. MECHANICAL ENGINEERING

Mar 2019 | Germany

UNIVERSITY OF CAMBRIDGE

ELLIS SUMMER SCHOOL

Jul 2023 | UK

Probabilistic Machine Learning

GYMNASIUM KRONSHAGEN

ABITUR

Jun 2015 | Germany

DPG-Abitur Award (Physics)

LINKS

 GitHub:// [brunzema](#)
 LinkedIn:// [paul-brunzema](#)

SKILLS

PROGRAMMING

Python (JAX, PyTorch, NumPy, ...)

Matlab • Shell • Git • ROS2 • $\text{\LaTeX}$

LANGUAGES

German (native)

English (fluent)

AWARDS & HONORS

SEW-EURODRIVE Student Award

2023 | Best Master's thesis

Dean's List | 2021-22

MathWorks Fellowship | 2021

Germany Scholarship | 2021

DPG-Abitur Award | 2015

HOBBIES

Chess • American football • Hiking

CrossFit • Cycling • Board games

My research lies at the intersection of **uncertainty quantification** (Gaussian processes, Bayesian neural networks) and **sequential decision-making** (Bayesian optimization, control, reinforcement learning). I aim to create agents and algorithms that efficiently and optimally act in uncertain and potentially changing environments.

EXPERIENCE

RWTH AACHEN UNIVERSITY | DOCTORAL RESEARCHER

Mar 2022 – Mar 2027 (expected) | Aachen, Germany

- Research on (time-varying) Bayesian optimization and event-triggered learning
- Created a MOOC on [Reinforcement Learning](#) (edX platform); in 2025, the course reached over 600 students across 83 countries

META | RESEARCH SCIENTIST INTERN

May 2026 – Sep 2026 | New York, NY, USA

Project: Agentic Bayesian optimization and surrogate-augmented autoresearch

- Introduced *agentic Bayesian optimization*: an LLM agent as the central decision maker in the optimization loop, informed by an uncertainty-aware BO backend
- The approach allows domain knowledge expressed in natural language, code, or documentation to guide optimization toward faster convergence and lower regret

TOYOTA RESEARCH INSTITUTE | RESEARCH SCIENTIST INTERN

Jun 2025 – Sep 2025 | Los Altos, CA, USA

Project: Vision-conditioned dynamics models for learning-based control

- Developed a vision-conditioned dynamics model that anticipates changes in system dynamics from visual context to inform a downstream MPC
- The approach was deployed in the autonomous racing stack on a physical Lexus LC 500 for racing in changing conditions on a test track

RWTH AACHEN UNIVERSITY | TEACHING & GRADUATE ASSISTANT

May 2019 – Mar 2022 | Aachen, Germany

- Assisted approx. 700 students in *Tutorial Control Engineering*
- Research on nonlinear model predictive control for fuel cell hybrid vehicles

PORSCHE ENGINEERING SERVICES | INTERN

Oct 2018 – Mar 2019 | Bietigheim-Bissingen, Germany
